Education

Bachelor of Science in Computer Science
Sonoma State University, CA | August 2021 - (Expected) May 2024

Projects

- **BioSoundSCape:** Researched and developed a convolutional neural network using acoustic data collected thourought South Africa to assist in ecosystems research
- **Portfolio Website:** Created using HTML, CSS, and JavaScript and hosted using an AWS S3 Bucket
- **A House Project:** Constructed a 3D world to roam and view a large 3D model using Three.js
- **Home NAS Server:** Used an old computer to create an Ubuntu server for hosting a network attached storage with a RAID 1 configuration in order to store personal files over a local network
- **Our Space Project:** Created a rudimentary social media which could handle +10,000 users, keeping track of user information: Name, biography, profile photo, and who follows who
- **Spam Detection:** Developed a rudimentary program in collaboration with a partner that used a large set of training data to determine if an incoming email was statistically likely to be spam or not
- **Wordle Guesser:** Created a Wordle guessing program that attempts to find the correct Wordle word
- **Worm Game:** Developed an ascii worm game similar to the classic snake game

Key Skills

C++|C|Python|C#|HTML|JavaScript|CSS|SQL|Visual Studio Code|Clion|Microsoft Visual Studio|Xcode
